SUBJECT INDEX TO VOLUME 9

A

A<sub>1</sub> and A<sub>2</sub> subgroups. See Blood group A, subgroups within ABO. See Blood group system

Adjuvant effect, endotoxin enhanced, of liposomes, particularly when antigen and endotoxin are within same liposome, 747-757

Adjuvant therapy, immune modulation and control of neoplasia by, book review, 83

Adrenatitis, experimental, cellular and humoral hypersensitivity to adrenal antigen in, 437-451

Agglutination, interallelic competition and complementation in ABO blood group system by, 139-153

Agglutinins

anti-A<sub>1</sub>

production of, in A-like rabbits injected with human group A<sub>1</sub> erythrocytes, 93-100

production of, in A-like rabbits injected with human group A<sub>1</sub> secretor saliva, 111-138

soybean, preparative fractionation of T and B lymphocytes of hamsters with, 759-768

Albumin. See Bovine albumin

Allogeneic challenge dose, effect of, on development of

delayed-type hypersensitivity and cell-mediated cytotoxicity, 559-568

Allopurinol, immunosuppressive effect of, 7-11

Animal studies

cross-reactions between, protamines of different, 283-288

inbred and genetically defined strains of, book review, 627

See also each individual species

Announcement, 329, 331, 423-424, 425, 789

Antibodies

to proteins from yolk of immunized hens, 495-514

structure and biosynthesis of, book review, 415-416

viral IgY, isolation of, from yolks of immunized hens, 475-493

Antibody expression, in secretions following gastrointestinal stimulation, 705-713

Antibody mediated response, restoration of, of zinc/caloric deficient neonatal mice, 611-626

Antibody synthesis, specific, murine model for analysis of spontaneous induction and feedback regulation of, 55-70

Antigens

book review, 723

## [Antigens]

- H and I, relationship between, 161-172
- H-2, influence of, on immunogenicity of thyroglobulin in mice, 725-730
- incorporation of, and endotoxin within same liposome, producing endotoxin enhanced adjuvant effect of liposomes, 747-757
- non H-2, serving as carrier determinants in a primary anti-Thy-1 response in mice, 309-317
- P, P<sub>1</sub>, and P<sup>k</sup>, genetic model for inheritance of, 191-201
- red cell Bg, changes in, in haematological disease, 173-190
- See also Blood group antigen In<sup>a</sup>; Cell fusion, antigen-directed chemically mediated; Lymphocytes, antigen specific; Mycobacterium tuberculosis H<sub>37</sub>RV antigens
- Antigen induced modulation, by shed lymphocyte membrane gangliosides, 543-557
- Antilatose antibodies, affinity labeled, similarity between tryptic peptides derived from equine Mu and rabbit gamma chains of, of restricted heterogeneity, 769-777
- Anti-lymphocyte serum (ALS), in-vitro studies on, on humoral immune response, 71-77
- Anti-Thy-1.2 antibodies, monoclonal, from hybridoma HO13-4 do not react with mouse natural killer cells, 371-378
- Anti-Thy-1 response, primary, non-H-2 antigens serving as carrier determinants in, in mice, 309-317
- Arginine clusters, role of, 283-288
- Autoantibodies, anti-A, with unusual properties in a patient on renal dialysis, 155-159
- B
- Bg. See Blood group system, red cell Bg
- Binding, of human and guinea pig Cl to human and guinea pig lymphocytes, 577-593
- Biomedical research
- inbred strains in, book review, 629
- invertebrate models for, book review, 535
- Biosynthesis, of antibodies, book review, 415-416
- Blood groups
- A
- anti-A autoantibodies with unusual properties in a patient on renal dialysis, 155-159
- production of anti-A agglutinins in A-like rabbits, injected with human A erythrocytes, 93-110
- production of anti-A<sub>1</sub> agglutinins in A-like rabbits injected with human group A<sub>1</sub> secretor saliva, 111-138
- subgroups within, 87-92
- antigen In<sup>a</sup>, 203-215
- antigen R1<sup>a</sup>, 217-223
- LW, 225-242
- in man, book review, 419-420
- Blood group system
- ABO, interallelic competition and complementation in, 139-153
- red cell Bg, changes in, in haematological disease, 173-190
- Books received, 421-422, 539-541

- Bovine. See Mononuclear cells, bovine peripheral blood; Spinal cord protein (SCP), bovine-derived
- Bovine albumin, iodinated, studies of integrity of, after circulating in-vivo, 297-308
- Bovine serum albumin, effect of prolonged immunization of mice with, on incidence of chemically induced tumors, 1-6
- Brain extract, murine, response of lymphocytes from multiple sclerosis patients to, 465-474
- C
- C<sub>1</sub>, studies of binding of human and guinea pig, 577-593
- C2 and C4, depletion of, in sera from hamsters bearing herpes simplex type 2-induced tumors, 569-575
- Calories, deficiency of, restoration of antibody mediated response of, neonatal mice, 611-626
- Canine. See Dog studies
- Carrier determinants. See Determinants, carrier
- Cell activation, immune, chemiluminescence and, 653-676
- Cell fusion, antigen-directed chemically mediated, 639-651
- Cell lines. See T cell leukermia-lymphoma cell lines
- Cell-mediated immune (CMI) responses, hemagglutinin and neuraminidase to influenza A virus following immunization in guinea pigs, 33-53
- Cell separation, book review, 533
- Cellular hypersensitivity, to adrenal antigen in experimental adrenalitis, 437-451
- Chemiluminescence, and immune cell activation, 653-676
- Circulation, in vivo, studies of integrity of iodinated bovine albumin after, 297-308
- Clinical immunology. See Immunology, clinical
- Cobra venom factor, effect of, of alternate pathway hemolytic activity in mice, 277-281
- Competition, interallelic, in ABO blood group system, 139-153
- Complementation, interallelic, in ABO blood group system, 139-153
- Complement proteins, human, guinea pig, and canine hemolytic equivalence of, 453-463
- Cryobiology, book review, 533
- Cyclophosphamide, effect of, on development of delayed-type hypersensitivity and cell-mediated cytotoxicity, 559-568
- Cytotoxicity, cell-mediated, effect of allogeneic challenge dose and cyclophosphamide treatment on development of, 559-568
- D
- Depletion
- of C2 and C4 in sera from hamsters bearing herpes simplex type 2-induced tumors, 569-575
- simple method for, of B lymphocytes from bovine peripheral blood mononuclear cells, 693-703
- Determinants, carrier, non-H-2 antigens as, in primary anti-Thy-1 response in mice, 309-317
- Dialysis. See Renal dialysis

Diffusion chambers, generation of suppressor T cells during the primary response of murine spleen cells in, 341-356

Disappearance reaction. See Macrophage disappearance reaction

#### Disease

immune effector mechanisms in, book review, 409  
passively induced, susceptibility of Lewis rats to experimental autoimmune encephalomyelitis after recovery from, 333-340

Dissociation, of DNA/anti-DNA complexes at high pH, 515-528

Distinctions, qualitative or quantitative, 87-92

DNA/anti-DNA complexes, dissociation of, at high pH, 515-528

Dog studies, complement proteins in, 453-463

#### E

Effector mechanisms, immune, in disease, book review, 409

#### Encephalomyelitis

experimental allergic, bovine-derived spinal cord protein protects guinea pigs from, 289-295

experimental autoimmune, susceptibility of Lewis rats to, after recovery from passively induced disease, 333-340

Endotoxin, incorporation of, and antigen within same liposome, producing endotoxin enhanced adjuvant effect of liposomes, 747-757

Enzymatic micromethod, 389-401

Enzyme immunoassay (EIA), use of protein A bearing staphylococcus aureus in, 379-387

Equine Mu, similarity between tryptic peptides derived from, and rabbit gamma chains of affinity labeled antilactose antibodies of restricted heterogeneity, 769-777

Erythrocytes, group A<sub>1</sub>, production of anti-A<sub>1</sub> agglutinins in A-like rabbits injected with, 93-110

Experimental allergic encephalomyelitis (EAE). See Encephalomyelitis, experimental allergic

Experimental autoimmune encephalomyelitis (EAE). See Encephalomyelitis, experimental autoimmune

#### F

Feed back regulation, murine model for analysis of, of specific antibody synthesis, 55-70

Fisher-Race model, statistical study for, for human Rh genetics, 427-436

Formycin B, 257-267

Fractionation, preparative, of T and B lymphocytes of the Syrian golden hamster with soybean agglutinin, 759-768

Fusion. See Cell fusion

#### G

Gamma chains, rabbit, similarity between tryptic peptides derived from equine Mu and, of affinity labeled antilactose antibodies of restricted heterogeneity, 769-777

Gangliosides. See Membrane gangliosides

- Gastrointestinal stimulation, antibody expressions in secretions following, 705-713
- Generation, of suppressor T cells during the primary response of murine spleen cells in diffusion chambers, 341-356
- Genetic model, for inheritance of P, P<sub>1</sub>, and P<sup>k</sup> antigens, 191-201
- Genetic strains, of laboratory animals, book review, 627
- Genetics, human Rh, statistical study of Fisher-Race model for, 427-436
- Glycolysis, estimation of PHA induced transformation in peripheral blood lymphocytes through measurement of, 389-401
- Granulocyte-macrophage colony stimulating activity, human, 731-734
- Guinea pig studies
  - studies of binding of human and, C<sub>1</sub> to human and, lymphocytes, 577-593
  - bovine-derived spinal cord protein protects, from experimental allergic encephalomyelitis, 289-295
  - cellular and humoral hypersensitivity to adrenal antigen in experimental adrenalitis in, 437-457
  - complement proteins of, 453-463
  - hemagglutinin and neuraminidase specific cell-mediated immune responses to influenza A virus following immunization in, 33-53
  - LW blood group in, 225-242
- H
- H. See Antigens, H and I; Antigens, non-H-2
- Haematological disease, changes in
  - red cell Bg antigens in, 173-190
- Hamster studies
  - depletion of C2 and C4 in sera from, bearing herpes simplex type 2-induced tumors, 569-575
  - preparative fractionation of T and B lymphocytes of, with soybean agglutinin, 759-768
- Hemagglutinin (HA), responses of, to influenza A virus following immunization in guinea pigs, 33-53
- Hemolytic activity, alternate pathway, effect of cobra venom factor on, in mice, 277-281
- Hemolytic equivalence, of human, guinea pig, and canine complement proteins, 453-463
- Hen studies
  - antibodies to proteins from yolk of, 495-514
  - isolation of viral IgY antibodies from yolk of, 475-493
- Herpes simplex type 2-induced tumors, depletion of C2 and C4 in sera from hamsters bearing, 569-575
- Heterogeneity, restricted, similarity between tryptic peptides derived from equine Mu and rabbit gamma chains of affinity labelled antilactose antibodies of, 769-777
- Heterologous antibody, effect of, on human platelet prostaglandin synthesis, 13-22
- Heterophile antibodies, in Japanese patients with various diseases including infectious mononucleosis, 403-408
- Human studies
  - anti-A autoantibodies with

## [Human studies]

unusual properties in, on renal dialysis, 155-159  
 studies of binding of, and guinea pig Cl to, and guinea pig lymphocytes, 577-593  
 studies on blood group antigen In<sup>a</sup>, 203-215  
 blood groups in, book review, 419-420  
 complement proteins of, 453-463  
 cross-reactions between pro- tamines of, 283-288  
 genetic model for ipheritance of P, P<sub>1</sub>, and P<sup>K</sup> antigens, 191-201  
 heterophile antibodies in, with various diseases, including infectious mononucleosis, 403-408  
 relationship between I and H antigens in, 161-172  
 interallelic competition and complementation in ABO blood group system in, 139-153  
 LW blood group in, 225-242  
 multiple sclerosis patients, response of lymphocytes from, to murine brain extract, 465-474  
 platelet prostaglandin synthesis effect of heterologous antibody on, 13-22  
 polymorphonuclear leukocyte elastase interaction of, with human IgM, 23-32  
 production of anti-A<sub>1</sub> agglutin- ins in A-like rabbits in- jected with group A<sub>1</sub> erythrocytes of, 93-110  
 production of anti-A<sub>1</sub> agglutin- ins in A-like rabbits in- jected with group A<sub>1</sub> secretor saliva of, 111-138  
 rare blood group antigen Rl<sup>a</sup> in, 217-223  
 Rh genetics, statistical study of Fisher-Race model for, 427-436  
 changes in red cell Bg antigens

in haematological disease, 173-190

T cell leukermia-lymphoma cell lines and granulocyte- macrophage colony stimu- lating activity in, 731-734

Humoral hypersensitivity, to adrenal antigen in experimental adrenalitis, 437-451

Humoral immune response, in- vitro studies on effect of anti-lymphocyte serum on, 71-77

Hyaluronic acid  
 additional evidence for role of, in the macrophage disappearance reaction, 735-746

participation of, in macro- phage disappearance reaction, 357-370

Hybridoma HO13-4, monoclonal anti-Thy-1.2 antibodies from, do not react with mouse natural killer cells, 371-378

Hybridoma methodology, modified, 639-651

Hypersensitivity  
 delayed-type, effect of allogeneic challenge dose and cyclophosphamide treatment on the developement of, 559-568  
See also Cellular hypersen- sitivity; Humoral hyper- sensitivity

## I

I. See Antigens, H and I  
 IgM, human, interaction of poly- morphonuclear leukocyte elastase with, 23-32  
 IgY. See Antibodies, viral IgY  
 Immune effector mechanisms, in disease, book review, 409

## J

Japan, patients of, heterophile antibodies in, with various diseases including infectious mononucleosis, 403-408

## L

Lectins. See Plant lectins  
Leukemia. See T cell leukemia-lymphoma cell lines

## Liposomes

endotoxin enhanced adjuvant effect of, 747-757  
multilamellar phosphatidylcholine as simple, biodegradable, and harmless adjuvant without immunogenic activity, 243-256

## Lung

immunologic and defense reactions in, book review, 537-538

immunology of, book review, 319

LW. See Blood group LW

Lymphocyte function, 257-267

## Lymphocytes

antigen specific, techniques for separation and selection of, book review, 631

## B

simple method for specific depletion of, from bovine peripheral blood mononuclear cells, 693-703

See also Lymphocytes, T and B  
studies of binding of human and guinea pig Cl to human and guinea pig, 577-593

peripheral blood, estimation of PHA induced transformation in, through measurement of their increased glycolysis, 389-401

response of, from multiple sclerosis patients to murine brain extract, 465-474

shed, antigen induced modulation by, membrane gangliosides, 543-557

## T and B

preparative fractionation of, of the Syrian golden hamster with soybean agglutinin, 759-768

recognition and function

of, book review, 785

Lymphoma. See T cell leukemia-lymphoma cell lines

## M

Macrophage. See Granulocyte colony stimulating activity

Macrophage disappearance reaction (MDR)

additional evidence for role of hyaluronic acid in, 735-746

participation of hyaluronic acid in, 357-370

Membrane gangliosides, shed lymphocyte, antigen induced modulation by, 543-557

## Mice studies

effect of allogeneic dose and cyclophosphamide treatment on development of delayed-type hypersensitivity and cell-mediated cytotoxicity in, 559-568

association between H-2 antigens and thyroglobulin influence on the immunogenicity of thyroglobulin in, 725-730

effect of cobra venom factor on alternate pathway hemolytic activity in, 277-281

additional evidence for role of hyaluronic acid in macrophage disappearance reaction, 735-746

participation of hyaluronic acid in macrophage dis-

   antibody expression in secretions following gas-

## [Rat studies]

- trointestinal stimulation of, 705-713
- Lewis, susceptibility of, to experimental autoimmune encephalomyelitis after recovery from passively induced disease, 333-340
- Renal dialysis, anti-A auto-antibodies with unusual properties in a patient on, 155-159
- Renal diseases, immunologically mediated, for diagnosis and treatment, book review, 85
- Respiratory defense mechanisms, book review, 537-538
- Restoration, of antibody mediated response of zinc/calorie deficient neonatal mice, 611-626
- Rh. See Genetics, human Rh
- Rosenlund, rare blood group antigen, 217-223

## S

- Saliva, human group A<sub>1</sub> secretor, production of anti-A<sub>1</sub> agglutinins in A-like rabbits injected with, 111-138
- Scientific paper, how to write and publish, book review, 327-328
- Secretions, antibody expressions in, following gastrointestinal stimulation, 705-713
- Sera, depletion of C2 and C4 in, from hamsters bearing herpes simplex type 2-induced tumors, 569-575
- Serum
  - requirements of, for opsonization of two serologically identical strains of pseudomonas aeruginosa, 677-691

See also Anti-lymphocyte serum; Bovine serum albumin

- Soybeans. See Agglutinin, soy-bean
- Spinal cord protein (SCP), bovine-derived, protects guinea pigs from EAE, 289-295
- Spleen cells, murine, generation of suppressor T cells during primary response of, in diffusion chambers, 341-356
- Staphylococcus aureus, use of protein A, in enzyme immunoassay, 379-387
- Statistical study, for Fisher-Race model for human Rh genetics, 427-436
- Stimulation. See Granulocyte-macrophage colony stimulating activity
- Streptococcal disease, book review, 633-634
- Structure, of antibodies, book review, 415-416
- Susceptibility, of Lewis rats to experimental autoimmune encephalomyelitis after recovery from passively induced disease, 333-340
- Synthesis. See Antibody synthesis; Prostaglandin synthesis

## T

- T cell leukemia-lymphoma cell lines, human, 731-734
- T cells, suppressor, generation of, during primary response of murine spleen cells in diffusion chambers, 341-356
- Thy-1. See Anti-Thy-1 response
- Thymocyte chemiluminescent responses, general features of, to plant lectins, 653-676

Thyroglobulin, influence of, on immunogenicity of, in mice, 725-730

Thyroxine, effect of, on immune response of mice in vivo and in vitro, 269-276

Transformation, PHA induced, estimation of, in peripheral blood lymphocytes through measurement of their increased glycolysis, 389-401

Tryptic peptides, similarity between, derived from equine Mu and rabbit gamma chains of affinity labeled antilactose antibodies of restricted heterogeneity, 769-777

#### Tumors

chemically induced, effect of prolonged immunization of mice with bovine serum albumin on incidence of, 1-6

See also Herpes simplex type 2-induced tumors

#### W

Write, how to, a scientific paper, book review, 327-328

#### Y

Yolk, antibodies to proteins from, of immunized hens, 495-514  
isolation of viral IgY antibodies from, of immunized eggs, 475-493

#### Z

Zinc, deficiency of, restoration of antibody mediated response of, neonatal mice, 611-626

#### V

Vaccine, preparation techniques of, book review, 783-784

Venom. See Cobra venom factor

COLLECTIVE CONTENTS TO VOLUME 9

Volume 9, Number 1, 1980

Effect of Prolonged Immunization of Mice with Bovine Serum Albumin on the Incidence of Chemically Induced Tumors. . . . . 1  
*S. P. Targowski and F. Milgrom*

A Study of the Immunosuppressive Effect of Allopurinol . . . . . 7  
*L. H. Toledo-Pereyra and R. Hoffman*

Effect of Heterologous Antibody on Human Platelet Prostaglandin Synthesis. . . . . 13  
*G. R. Favis and R. W. Colman*

Interaction of Human Polymorphonuclear Leukocyte (PMN) Elastase with Human IgM. Production of a Factor Enhancing PMN Migration *in Vitro* . . . . 23  
*H. E. Prince, J. D. Folds, and J. K. Spitznagel*

Hemagglutinin and Neuraminidase Specific Cell-Mediated Immune Responses to Influenza A Virus Following Immunization in Guinea Pigs . . . . . 33  
*T. C. Chow, K. R. Beutner, and P. L. Ogra*

A Murine Model for Analysis of Spontaneous Induction and Feedback Regulation of Specific Antibody Synthesis. . . . . 55  
*R. P. Phipps, J. G. Tew, G. A. Miller, and T. E. Mandel*

In Vitro Studies on the Effect of Anti-Lymphocyte Serum on the Humoral Immune Response. . . . . 71  
*C. Reuben and G. P. Phondke*

**Malignant Melanoma, Sandra J. Tems-Reines and Michael J. Mastrangelo**  
**Accessible Tumors, E. Klein, R. A. Schwartz, R. W. Case, O. A. Holtermann, J. Solomon, G. M. Hahn, C. W. Boone, and I. Djerassi**  
**Human Leukemia, Samuel Murphy and Evan Hersh**  
**Lung Cancer, Martin F. McKneally**  
**Gastrointestinal Carcinoma, Michael J. O'Connell, Charles G. Moertel, Roy E. Ritts, Jr., and Judith Rich O'Fallon**  
**Malignant Sarcoma, James A. Neidhart**  
**Head and Neck Cancer, Daniel E. Lehane**  
**Human Lymphoma, Stephen E. Jones**  
**Breast Cancer, Gerald W. King and Charles Henderson**  
**Genitourinary Cancer, David Eidinger**  
**Gynecologic Cancers, David S. Alberts**

ISBN: 0-8247-6942-2

\* Immunology is a series of individual volumes under the general editorial direction of Noel Rose, Wayne State University, Detroit, Michigan.

*Clinical Immunotherapy* brings together a remarkable group of essays written by the outstanding experts in the field of tumor immunotherapy and contains thorough reviews of the research on immunotherapy as well as immunologic assays used in the treatment of tumors.

In the past 15 years there have been many clinical trials of tumor immunotherapy using specific, nonspecific, and combination immunotherapy regimens. Full accounts of these clinical procedures are presented in *Clinical Immunotherapy* as they apply to a wide variety of cancers, such as acute leukemia, breast cancer, and cancer of the colon. This disease-oriented approach, combined with current indications of success rates, will greatly benefit physicians who are counseling cancer patients.

This book provides researchers, oncologists, tumor immunologists, and clinical immunologists with convenient information on the entire range of usable knowledge in this field as it exists currently and as it is moving ahead in response to present needs.

# Cancer Biology Reviews

VOLUME I

edited by

**JOHN J. MARCHALONIS**

**MICHAEL G. HANNA**

**ISAIAH J. FIDLER**

*Cancer Biology Program  
Frederick Cancer Research Center  
Frederick, Maryland*

May, 1980

368 pages, illustrated

## CONTENTS

**Antigen Receptors on Thymus-Derived Lymphocytes, John J. Marchalonis and Gregory W. Warr**

**The Endocrine Thymus: A Role for Thymosin and Other Thymic Factors in Cancer Immunity and Therapy, Glennwood E. Trivers and Allan L. Goldstein**

**Comparative Biology of Mammalian Retroviruses, James N. Ihle, Howard Charman, and Raymond V. Gilden**

**Immune Reactivity to Autochthonous Tumors In Ultraviolet Carcinogenesis, Margaret L. Kripke**

**Oncodevelopmental Antigens, Stewart Sell**

ISBN: 0-8247-6856-6

Enormous interest has evolved in the broad area of scientific endeavor termed "cancer biology." Topics that fall under this general heading are the origins of neoplastic cells, their molecular and biological properties, and the networks of host defenses that allow recognition of and reaction to tumor cells and their products. This is a rapidly expanding and changing area of investigation, and the results of relevant studies are published in a variety of specialized journals.

*Cancer Biology Reviews* brings together the diverse aspects of cancer biology and provides an interdisciplinary forum for the publication of up-to-date results. The contributors to *Cancer Biology Reviews* are encouraged to stress their own work and viewpoints and to relate these to the more general issues of cancer biology that pertain to the interests of all oncologists, immunologists, cell biologists, molecular biologists, developmental biologists, microbiologists, biochemists, and pathologists who are involved in cancer research.

## INSTRUCTIONS FOR PREPARATION OF MANUSCRIPTS FOR DIRECT REPRODUCTION

IMMUNOLOGICAL COMMUNICATIONS is a bi-monthly journal in the English language for the rapid communication of immunological information.

### Directions for Submission to IMMUNOLOGICAL COMMUNICATIONS

One manuscript suitable for direct reproduction (see Instructions for Preparation), carefully inserted in a folder, and two copies of the manuscript must be submitted.

### Reprints

Owing to the short production time for articles in this journal it is essential to indicate the number of reprints required upon notification of acceptance of the manuscript. Reprints are available in quantities of 100 and multiples thereof, in addition to the twenty (20) free copies provided to the senior author with orders of 100 or more reprints; a reprint price list will be sent to the senior author with the notification of acceptance of the manuscript.

### Manuscripts should be mailed to:

Editorial Office, The Center for Immunology  
203 Sherman Hall, School of Medicine  
State University of New York at Buffalo  
Buffalo, New York 14214

### INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

Since all the contributions are reproduced by direct photography of the manuscripts, the following instructions must be strictly adhered to. Non-compliance will result in the return of the manuscript to the author(s) and delay in its publication.

### Typing Instructions

1. Manuscript must be typewritten, double spaced, on good quality white bond paper measuring at least 8½ x 11 inches.
2. It is essential to use a black typewriter ribbon in good condition so that a clean and clear impression of the letters is obtained. Erasure marks, smudges, creases, etc., should be avoided. (Errors may be corrected by using white opaque correcting fluids or tapes).
3. All formulas and equations should be typed in or carefully prepared in permanent black ink, using drawing instruments.
4. The typing area of page 1, including the title, should be 6¼ by 8½ inches and that of all other pages 6¼ x 9½ inches. Make maximum use of the typing area.
5. Tables should be typed as part of the text but in such a way as to separate them from the text by a three-line space at both top and bottom of each table. The title "TABLE" (capitalized and followed by a Roman number) should precede the table and be centered on the page. Care should be taken that a table does not overlap onto the next page.
6. Drawings, graphs and other numbered figures should be drawn in black India ink (do not use blue ink) on a separate piece of white paper. Photographs should be glossy prints. Lettering set should be used for all labels on the figures or photographs; a typewriter may be used for labels. Captions for the figures should be

typed (single spaced) on a separate sheet, along the full width of the type page. The indication "FIGURE" should be capitalized and, with the figure's number (in Arabic numerals), centered above the caption. The numbers of the figures or photographs as well as the name(s) of the author(s) should be written in blue pencil on the back; the top of the picture should also be indicated on the back. The author(s) should indicate (with a blue pencil) the places in the text where the picture(s) should be inserted.

7. References (including footnotes) in the text will be numbered consecutively by numbers in parentheses. The full references (and footnotes) will be collected at the end of the text. The last names of all authors to any one paper, followed by their initials, shall be quoted. The title of the journal (Chemical Abstracts abbreviations), the volume number (underlined), the first page and the year should follow, in that order. Books should be cited similarly and include the publisher's name and location along with the year and edition of the book. Articles or chapters in books should be cited similarly and include the name of the editor(s) of the book and the page on which the article begins, as well as the volume number.

(journal): Thrasher, S. G., Doroszczak, N. and Cohen, S., J. Immun., 107:1394, 1971.

(book): Pressman, D. and Grossberg, A. L., The Structural Basis of Antibody Specificity. W. A. Benjamin, Inc., New York, 1968.

(article in a book): Milgrom, F., in International Convocation on Immunology, edited by N. R. Rose and F. Milgrom, p. 270, S. Karger, New York, 1969.

### Format of Manuscripts

1. The entire title should be in capital letters and centered on the width of the typing area, at least two inches from the top of the page. This is followed by a one-line space and then by the name(s) and address(es) of the author(s), in the following way:

#### AUTOIMMUNE RESPONSES TO THYROGLOBULIN IN THE RAT

T. J. Atkins and H. Z. Ginsberg  
Departments of Microbiology and Pathology,  
School of Medicine, State University of New York  
at Buffalo, Buffalo, New York 14214

2. The title and the name and address of the author(s) are followed, after a three-line space, by an abstract, comprising less than 10% of the length of the text of the article. The abstract must be typed single-spaced and headed "Abstract".
3. After a three-line space, the article itself commences, whenever possible subdivided into sections such as "Materials and Methods," "Results," "Discussion," "Acknowledgments" and "References." The headings should be centered, underlined, and separated by one extra line space from the typed material that precedes and follows it.
4. Each page of manuscript should be numbered lightly at the bottom of the sheet, with a blue pencil.

# IMMUNOLOGICAL COMMUNICATIONS

Volume 9, Number 8, 1980

## CONTENTS

Association between H-2 Antigens and Thyroglobulin Influences the Immunogenicity of Thyroglobulin in Mice . . . . .	725
<i>A. O. Vladutiu</i>	
Human T Cell Leukemia-Lymphoma Cell Lines and Granulocyte-Macrophage Colony Stimulating Activity . . . . .	731
<i>K. Kubota, H. D. Preisler, and J. Minowada</i>	
Additional Evidence for the Role of Hyaluronic Acid in the Macrophage Disappearance Reaction . . . . .	735
<i>B. T. Shannon and S. H. Love</i>	
Endotoxin Enhanced Adjuvant Effect of Liposomes, Particularly When Antigen and Endotoxin Are Incorporated within the Same Liposome . . . . .	747
<i>N. van Rooijen and R. van Nieuwmegen</i>	
Preparative Fractionation of T and B Lymphocytes of the Syrian Golden Hamster with Soybean Agglutinin . . . . .	759
<i>W. A. Weppner and L. R. Adkison</i>	
Similarity between Tryptic Peptides Derived from Equine MU and Rabbit Gamma Chains of Affinity Labeled Antilactose Antibodies of Restricted Heterogeneity . . . . .	769
<i>G. Krishnan</i>	
Book Reviews. . . . .	779
Announcement. . . . .	789
Author Index to Volume 9 . . . . .	791
Subject Index to Volume 9 . . . . .	795
Collective Contents to Volume 9 . . . . .	807
